

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A device ~~(20)~~ for placing a call in an elevator system, comprising:

a surface ~~(70)~~ that is manually touchable to indicate a desired call; and

a responder ~~(56)~~ that automatically provides a tactile confirmation of the desired call.
2. (Currently Amended) The device of claim 1, wherein the surface ~~(70)~~ is supported on a moveable member ~~(52)~~ that is manually moveable to indicate the desired call.
3. (Currently Amended) The device of claim 2, wherein the responder ~~(56)~~ comprises an automated mover ~~(56)~~ that automatically moves the moveable member ~~(52)~~ to provide the tactile confirmation.
4. (Currently Amended) The device of claim 3, comprising a housing ~~(54)~~ that supports the moveable member ~~(52)~~ such that the moveable member is manually moveable relative to the housing in at least one direction.
5. (Currently Amended) The device of claim 4, wherein the automated mover ~~(56)~~ moves the moveable member ~~(52)~~ relative to the housing ~~(54)~~.
6. (Currently Amended) The device of claim 4, wherein the automated mover ~~(56)~~ moves the moveable member ~~(52)~~ in a second direction relative to the housing ~~(54)~~.

7. (Currently Amended) The device of claim 3, wherein the automated mover ~~(56)~~ comprises a vibrating motor.
8. (Currently Amended) The device of claim 3, wherein the automated mover ~~(56)~~ moves responsive to a manual manipulation of the moveable member ~~(52)~~.
9. (Currently Amended) The device of claim 3, including a controller ~~(68)~~ that determines when the moveable member ~~(52)~~ has been moved and the automated mover ~~(56)~~ moves responsive to the controller.
10. (Currently Amended) The device of claim 1, wherein the surface ~~(70)~~ is capacitive and the device provides a call signal responsive to human contact with the surface.
11. (Currently Amended) The device of claim 1, wherein the surface ~~(70)~~ is supported on a hall call button ~~(26, 28)~~ that is adapted to be placed on a selected surface in a building.
12. (Currently Amended) The device of claim 1, wherein the surface ~~(70)~~ is supported on a car operating panel ~~(40)~~ that is adapted to be placed in an elevator car.
13. (Currently Amended) A method of acknowledging that a call button ~~(26, 28, 44, 46)~~ signal has been received in an elevator system, comprising:
providing a tactile confirmation at the call button ~~(26, 28, 44, 46)~~.

14. (Currently Amended) The method of claim 13, including automatically moving a surface ~~(70)~~ that is touched by an individual at least a portion of the call button ~~(26, 28, 44, 46)~~.

15. (Currently Amended) The method of claim 13, including vibrating at least a portion of the call button ~~(26, 28, 44, 46)~~.
